Hyderabad, India | +916309835390 | taabishahmedansari22@ifheindia.org | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

A technically proficient B.Tech final-year student with a comprehensive skill set in data analytics, machine learning, and cloud infrastructure. Experienced in building end-to-end data pipelines and developing data-driven solutions. Seeking an opportunity to apply strong analytical and collaborative skills to a role focused on leveraging data for strategic impact.

EDUCATION

ICFAI Foundation for Higher Education

Bachelor in Artificial Intelligence and Data Science

Course Work: Python, Java, C Programming, Data Science, Data Wrangling and Visualization using R, Data Structures, Database Management System, SQL, Artificial Intelligence, Machine Learning, Web Technologies, Big Data Systems, Block Chain, Cloud Computing.

Hyderabad, India

August 2022 – June 2026

Narayana Junior College

Higher Secondary Education

Hyderabad, India

June 2020 – May 2022

International School

Secondary Education

Hyderabad, India

March 2012 – April 2020

SKILLS

Technical skills:

Python, Java, C, MySQL, Debugging, Microsoft PowerBi, Prompt Engineering, VS code, Jupyter, HTML, CSS, JavaScript. Cloud Computing (**AWS**): EC2 instance management, Bastion Host configuration, VPC setup with NAT Gateway, IIS web hosting on Windows Server, S3 static website hosting, versioning, and life-cycle management.

Soft skills: Problem Solving, Communication, Teamwork, Presentation, Attention to detail.

PROJECTS

Agentic AI-Based Orthopedic Clinical Decision Support System:

February 2026

- Developed a multi-agent AI system for orthopedic diagnosis integrating case generation, LLM-based inference, and structured evaluation.
- Designed a quality-aware evaluation framework assessing outputs across accuracy, safety, hallucination risk, completeness, and clinical reasoning.
- Implemented a multi-agent architecture (triage, evidence, diagnosis, safety) to simulate real-world clinical workflows.
- Analyzed performance using classification metrics, confusion matrix, and multi-dimensional evaluation, identifying limitations of accuracy-based assessment.
- Built an interactive dashboard using Streamlit to visualize datasets, model outputs, and evaluation metrics for comprehensive system analysis.

Credit Card Fraud Detection using Random Forest Algorithm:

May 2025

- Developed a machine learning model using the Random Forest algorithm with scikit-learn to detect fraudulent credit card transactions.
- Preprocessed and analyzed real-world transaction data using Pandas, NumPy, and handled class imbalance with techniques. Evaluated model performance using confusion matrix, precision, recall, and F1-score with scikit-learn's metrics module.

AI Text & Image Generator:

December 2024

- AI application integrating OpenAI's GPT-4 & Google's Gemini models, showcasing multi-model integration capability. Implemented secure API management using Streamlit secrets system, following security best practices.

AWARDS, ACHIEVEMENTS, CERTIFICATIONS

- Participated in **CBIT Hacktoberfest** in 2024 and **Lords Hack Prix** in 2025.
- Successfully cleared assessment on "**Acquiring Data**" with a Gold category score (84%), aligned to IT-ITeS Sector Skills Council NASSCOM competency standards.
- Successfully cleared assessment on "**Data Processing and Visualisation**" with a Gold category score (74%), aligned to IT-ITeS Sector Skills Council NASSCOM competency standards.
- Successfully cleared assessment on "**Exploratory Data Analysis**" with a Gold category score (79%), aligned to IT-ITeS Sector Skills Council NASSCOM competency standards.
- Completed a self-paced training course on "**Signal Segmentation with Deep Learning**" from MathWorks Training Services.
- Completed **Deloitte's Data Analytics Job Simulation** on Forage, gaining hands-on experience in data analysis and forensic technology.
- Participated in the **AWS GenAI Ideathon 2024**, organized by IcfaiTech in association with AWS, and built a website using partyrock.
- Completed the **AWS Cloud Practitioner Essentials** self-paced training course on AWS SkillBuilder.
